# Arguments FOR AI in Art

- AI as a tool: Like a brush or camera, AI is a tool guided by humans
- Style transfer: AI can merge a photo with famous artistic styles (e.g., Van Gogh)
- Enhanced process: Tools like Adobe Sensei automate edits, free up time
- Personalized & predictive design: AI tailors content and forecasts trends
- Accessibility: Advanced creative tools for all skill levels

# Concerns About AI in Art

- ✓ Lack of authorship: No human intent or emotional depth
- ✓ Emotional & symbolic gap: AI misses cultural and personal meaning
- ✓ Copyright issues: Who owns AI-generated works?
- ✓ Artistic inflation: Mass AI content lowers perceived value
- ✓ Market threat: Uniqueness and originality are questioned

**Hallucination is everything LLMs (large language models) do. They are dream machines. We guide their dreams using prompts. Prompts trigger the dream, and based on the model's hazy memories of its training documents, the result is often useful... Hallucination is not a bug — it's the best feature of LLMs."**
