

## GUIDE FOR AUTHORS

**Agriculture and Environment** is an international print and online scientific journal of the Tavria State Agrotechnological University, dedicated to publication of scientific papers in all areas associated with the development of mechanized agriculture and related disciplines. In order to facilitate the submission, consideration and publication of papers, these guidelines are prepared to provide the following information and suggestion to serve as a guide for future contributors. All papers will be submitted to external reviewers. The submission of a paper implies an undertaking by the author not to submit it simultaneously to other publications. The author is fully responsible for the originality, scientific quality and formal correctness of the paper. Original scientific papers are published in the English language.

### PAPER STRUCTURE

**Title.** Short, brief, and concise information on the paper content.

**Authors.** The surnames and first names of all authors, who contributed to the paper preparation (separated by commas), followed by the workplace address at the next line. Academic degrees should not be forwarded.

**Abstract.** It is a short summary of the whole paper (as a single paragraph). It should clearly estimate goals of research and bring a brief description of experiment(s), the main observations, results and conclusions. Provide an abstract of not more than 200 and not less than 100 words. It should be clear, without referring to the paper. Use complete sentences and limit the use of abbreviations. Repeating the paper title at the beginning of the abstract is not recommended. The subject of the paper should be given at the beginning, new facts, data and methods should be presented herein.

**Key words in English.** Up to a maximum of five key words starting with small letters should be listed at the end of abstract.

**Introduction.** It should afford a review of the related works and the information concerning the state of the research of the relevant questions. Related references are recommended. The introduction should not be divided into subunits.

**Material and Methods.** All preliminary material, experiments conducted, their extent, conditions and course should be described in detail. This section should consist of subunits describing equipment, methods, and procedures. It is necessary to provide readers with enough details of methods and equipment to enable the described procedure to be repeated. When the methods are not original, the adequate references are recommended. Statistical processing methods, including the software used, should also be listed in this section.

**Results and Discussion.** Results should be presented briefly in tables or figures. The author should confront partial results with data published by other authors, whose names and year of publication are to be cited by including them in the text directly (e.g. as published by Ellis (2008); Brennan and Smith (2005) found) or citing authors and years of publication in parentheses (Peng et al., 2010; Cole and Hogan, 2016) separated by semicolons. Provide enough data to give reason for the conclusions. The same information should not be given in different forms (tables, graphs, text). In the discussion, there is necessary to emphasize the importance of the findings and to compare the information obtained with existing knowledge, if possible. Tables and figures should be marked understandably; photos, graphs, diagrams, maps, etc. should have a legend. Using <sup>TM</sup> and <sup>®</sup> with products is necessary.

**Conclusion.** It is necessary to mention briefly the most important results presented in the paper, the key points of following research and experimental work, and recommendations for use in practice.

**References.** References should be written in accordance with the Standard ISO 690. References should be listed in alphabetical order according to the surname of the first author, without numbering the individual items. Only papers cited in the text must be included in the list of references.

**Contact address.** It should include the full name (including scientific degrees) of the corresponding author and co-authors, a complete official address of this working place in English (as indicated on the website of the workplace), and the email address of the corresponding author.

### Contact

Manuscripts should be emailed in the (.doc) format to **office@tsatu.edu.ua**. The corresponding (submitting) author is responsible for managing all communication between the journal and all co-authors, before and after publication. Before publication, papers will be emailed to the corresponding author for proofreading. The author's response, with or without corrections, should be sent as soon as possible. Compliance with these instructions is obligatory for all authors.

### Address

Tavria State Agrotechnological University, 18 B.Khmelnitsky Ave, Melitopol, Zaporizhia obl. 72310, Ukraine;
